Ambit's expertise in Media fit out is extensive and the following document provides a sample of the exciting projects we have recently completed.

At Ambit we continuously review and adapt our processes and ways of working to ensure that we set and maintain the highest standards. Regardless of the size of the project or degree of fit out required we are committed to providing the best value and experience for our clients, every time.

As ever, our method is underpinned by our belief in providing a fully collaborative approach to contracting – something we passionately believe in! Whilst the last year has been particularly challenging for all, Ambit have completed all projects on time and all to the highest quality. This is a testament to both our management teams and the depth and commitment of our supply chain partners.

While our scope of services includes traditional contracting, spanning both single and two stage tendering, detail and build and design & build, we have invested in in-house designers to enable more comprehensive support and a truly bespoke service to meet your needs.

Whether the project is £500,000 or £15m, every project is treated with the full commitment and passion of our management team, who are dedicated to continuously improving the experience of our clients.

The following document highlights key examples of our capabilities and we would be delighted to speak with you about any futures projects you have or are considering.

- TV Studios
- Edit Suite
- Green rooms
- Staff areas
- 1000 kVA power upgrade

Ambit's Added Value

Design

Ambit carries internal design who can add value to a client design or provide full design services, our technical team will ensure that design and detailing provides robust solutions and meets the required ratings. Our team from their experience will ensure that service penetrations/ door openings/ ventilation etc are fully co-ordinated into the design.

Stakeholder co-ordination

Our team will take ownership of the key stakeholders, primarily:

- Client design standards
- Acoustic consultant
- Services designer
- AV Consultant
- IT consultant
- Tech/ Equipment integration
- Building Control
- Fire Officer

Our team will ensure that all parties roles and remits are clearly defined and best practice is maintained, we provide a full 'responsibilities matrix' which will be issued to all and discussed at an initial meeting for agreement.

Technical Expertise

Ambit technical team are fully conversant with the detailed technical input and co-ordination required, as such can identify all key issues and design them out in advance.

Supply Chain

Ambit has carefully vetted supply chain partners who's teams understand the detailing and the need to maintain a sequence of works in a timely manner. Media buildings can be very material heavy in terms of the multilayers wall construction and associated acoustic materials, as such early ordering of materials is essential.

Quality Control

Ambit carry out continuous QA checking and invite all stakeholders to inspect and provide comments as the works progress to ensure a right first time installation.

Programme

We are fully aware that studio time is sold/ allocated well ahead of the build completion, as such the completion is absolutely essential and must be protected. Ambit will monitor the design and build processes on a daily basis, any slippage is immediately actioned by extended working/ resequencing or additional resourcing.

Communication

Our team will at all times maintain open and honest reporting to the Client teams. We know that on media/ studio builds there is a huge amount of expertise available and we will always discuss issues with the team to ensure the best resolution is met promptly!
